Thanks for the heads-up, Jane.

This would be a good time to remind HQ that have a more important role in shaping the State's Water Quality Control Plan than we do in shaping the BDCP.

The Bay Delta Team will prepare briefing papers covering both topics along with the important work being done by WTR-3 on watersheds, resiliency, and pollution prevention.

Hi Jeff and Jane,

Cynthia and Ken K spoke recently about the Bay Delta project. As you know, Ken (and Bob P) have been attending meetings with the other federal Agencies on the project but now that the DEIS is out we have to meet our 309 responsibilities. Ken and Cynthia would like to plan a high level meeting the second or third week of January to discuss our strategy for moving forward. That will probably not be scheduled till after the holidays but I wanted to give you an early heads up so you can start thinking about it. I believe that Ken will also be speaking to Jared.

Susan
